EXPERIENCE

Senior Software Developer

Oct 2023 – Present

Boeing (Jeppesen) Montreal

- Worked on airline operations software for crew scheduling and tracking. Primarily developing and maintaining backend services for a variety of integrations with other core airline systems.
- Created an automated flight ticket booking service, and integrated it on a day of operations system, frontend and backend.
- Pioneered efforts for improving end to end test coverage, migrations from legacy libraries and developing tools for improving the developer experience for my colleagues.
- Taught courses on backend data interface development and automated testing to developers across North America.

Software Developer

Mar 2021 – Oct 2023

Telus Communications Inc. Montreal

- Worked as a vendor in the premium support organization for Google's Cloud Platform.
- Developed internal quality of life tools for various teams. Including reporting/alerting services, analytics pipelines and a full stack work prioritization and distribution tool.
- Supported and coached front line team members through technical consultations on their customer case work.
- Worked on troubleshooting and prototyping solutions to technical problems on escalated customer cases.

Full Stack Developer

2017 – 2020

Freelance Montreal

- Created and maintained web applications for a few local businesses across a few different tech stacks.

EDUCATION

BSc in Mathematics and Computer Science

2018 - 2020

Concordia University Montreal

DEC in Pure and Applied Sciences

2015 - 2017

John Abbott College Montreal
